What is beta program in messenger.

September 23 Apple's most rugged Apple Watch with improved GPS, a 49mm casing, a more durable display, extra long battery life, a built-in Action button, and more. Pre-orders available now. Right on schedule, NetEase Games and CCP Games has rolled out the open beta for EVE Echoes. This is a brand new sci-fi MMORPG that aims to deliver an authentic EVE Online experience for mobile devices that's set in a parallel New Haven universe. The EVE Echoes open beta is currently available for both Android (opens in new tab) and iOS (opens in new tab) and should be accessible to players in Australia, USA, Canada, Russia, Europe, South Korea and New Zealand starting today. I've been excited for the opportunity to dive into the game ever since I got a sneak preview at EVE Vegas. Now is the perfect time to check out all that the game has to offer before the servers are reset ahead of the global launch in 2020. EVE Echoes (Early Access) EVE Echoes is an expansive and open-ended space sim MMORPG where you can pilot your own space ship and explore and thrive in a brand new galaxy however you want. Free at Google Play Store (opens in new tab) It's an open beta so be prepared for plenty of bugs Source: Android Central (Image credit: Source: Android Central) Patience is a key virtue for beta testers, as there's bound to be some glitches and bugs to be squashed — even on day one. For instance, I've yet to actually get into the game myself as the game servers appear to already be under maintenance. It's sort of disheartening, but also sort of to be expected when beta testing a game of this scale. EVE Echoes has already been downloaded over 100,000 times according to the Google Play Store, which is surely pushing the beta servers to their limits. Other Twitter users who've managed to get into the game have reported loading issues for the game's central marketplace and an overall laggy experience, which might explain why the servers are currently being worked on. Dive into the tutorials and give the devs your feedback. Once you're in the game, there are some pretty important features available to new players who are new to EVE Online's brand of dense space simulation. Most importantly, you'll want to check out the tutorials and new Storyline Missions added that are perfect for acclimatizing new players with the menus and core gameplay. This is, in my opinion, one of the most important features included with EVE Echoes, and I'm sure the developers would be very open to any feedback from new players on how these materials can be improved. Once the server issues have been settled, you can be sure that I'll be exploring everything I can in the game and writing up any cool discoveries or guides to help other new players out. Free at Google Play Store (opens in new tab) (Image credit: Blizzard) The Diablo 2: Resurrected beta kicks off this month, allowing players to get an early taste of the remake ahead of its launch in September. The beta will be split across two weekends. The first will begin on August 13 at 1 p.m. ET and will be exclusively for those who have pre-ordered Diablo 2: Resurrected or the Diablo Prime Evil Collection, which bundles together the Diablo 2 remake as well as Diablo 3. The beta will be available on PC, PS5, PS4, Xbox Series X and Xbox One. The Nintendo Switch version has unfortunately been omitted from the beta period. The closed beta runs until August 17 and will allow players to choose from the Amazon, Barbarian, Druid, Paladin or Sorceress class and play through the entirety of the game's first two Acts. The ability to play with up to seven other people will also be included in the beta, so you can cleave through hordes of demons with friends. The following weekend, an open beta will take place. As the name implies this will be available to all players, so will be a great chance to try out the game if you're unfamiliar with the Diablo franchise. The open beta begins on August 20 at 1 p.m. ET and ends on August 23. It will offer the same content as the closed pre-order-only beta from the weekend before. (Image credit: Blizzard) Diablo 2: Resurrected is a full-scale remaster of Diablo 2, which first launched back in 2000. The refresh is being worked on by Vicarious Visions, the developer responsible for the well-received Crash Bandicoot: N. Sane Trilogy and Tony's Hawk Pro Skater 1+2 Remake. The team definitely has pedigree when it comes to remastering a classic game for modern audiences, while keeping the core elements intact. After the beta, players won't have long to wait to get their hands on the full game: Diablo 2: Resurrected is scheduled to release across all systems on September 23. If you want to play on a next-gen console be sure to bookmark our PS5 restock and Xbox Series X restock hubs to make the task of tracking down one of these machines slightly easier. The update adds a new skin, Windows 7-style visual tabs, turbo compression for browsing on slow connections, auto-update to new versions, and support for Bittorrent within the browser. The new look is the work of designer John Hicks, who joined the team recently. It's labelled as a work in progress, but arguably it already represents a significant improvement in the browser's attractiveness. The visual tabs are pretty nifty too. Either hover over a tab to view a preview, or drag the tab bar down a bit to get a small thumbnail image of the page. Very useful for keeping track of an HD video loading on YouTube or a flash game's progress. Dashlane can keep your employees' passwords safe By Pocket-lint Promotion 23 August 2022 If you're concerned about your organisation's security, this is a no-brainer. "Your Web browser is the most important piece of software you will ever use", Jon von Tetzchner, CEO of Opera Software told Pocket-lint. "We think Opera 10 will redefine how you can enjoy the Web. We have more surprises on the way, but when you try the features, enjoy the accelerated performance and get a glimpse at our shiny new wrapping, I think Opera 10 beta will excite both long-time users and those new to Opera". Check out the screenshots and if you'd like to try out the beta, then you can download it right now from opera.com/next. Writing by Duncan Geere. Valorant Jett (Image credit: Riot Games) Riot Games has kicked off the Valorant closed beta, the first public hands-on opportunity for its upcoming tactical shooter for PC, on track for a summer 2020 general release. The game embraces the fundamentals of any competitive hit shooter, with robust core gunplay, hero-based abilities, and custom netcode to support its multiplayer vision. The proposed result is a fluid, tournament-ready arena, marking a new endeavor for the League of Legends creator. Here's what you need to know about the beta and how to play today. What is the Valorant closed beta? Source: Riot Games (Image credit: Source: Riot Games) The Valorant beta represents a snippet of Riot Games' upcoming project, serving as an opportunity for the studio to test its multiplayer gameplay and backend technologies across a broader group of players. It's available exclusively via an invitation-only closed beta program for budding players in the United States, Canada, Europe, Russia, and Turkey. While Riot Games has expressed interest in expanding to additional regions, current world events are a factor in that process. The beta test features nine playable "agents" from the Valorant roster across two maps. Players will have an opportunity to experiment with abilities and weaponry across the two locales, although with progress unable to translate to the final release. But if you're looking to play Valorant's ongoing beta, it's not easy to get started. How to get a Valorant Beta code Source: Riot Games (Image credit: Source: Riot Games) Valorant takes an unusual approach to closed beta availability, forgoing the usual process of randomized sign-up forms, raffles, or preorder bonuses. Riot Games has instead entered a partnership with Twitch, aiming to boost viewership throughout the period. The proposed system requires having a Riot Games and Twitch account linked, watching Valorant streams over the coming days. Loot-enabled streams will randomly award beta access to select viewers, requiring you to watch Twitch personalities throughout the day for a chance to receive your beta invite. It follows the first opportunity to secure codes via streams back on April 3. After linking accounts, look out for the "Drops Enabled" identifier on Valorant Twitch streams. Source: Windows Central (Image credit: Source: Windows Central) Select the Connections tab. Locate the Riot Games tile. Click Connect. Sign-in with your Riot Games account credentials. Click Authorize. Source: Windows Central (Image credit: Source: Windows Central) Navigate to the Valorant directory on Twitch. Watch a Valorant Twitch stream for a chance to receive a code. The stream must offer Twitch drops, indicated by a "Drops Enabled" tag below the stream's title. The Valorant beta opened on April 7, 2020, available from 8 AM ET / 5 AM PT / 2 PM CEST across Europe and North America. The developer remains quiet on how long the test will last, stating it wants to "keep closed beta as short as we can while getting additional regions online." There's no set end date in sight, but expect additional updates as testing continues. Valorant open beta Valorant remains highly anticipated ahead of its summer launch, although Riot Games has yet to indicate plans for an open beta. The developer has stressed a desire to keep availability restricted for the closed beta, as demonstrated by sought-after invites. While a public test hasn't been ruled out, expect further details closer to release. PC Gaming Main
